i think that microsoft is violated the antitrust laws already. and if you dont break up the microsoft soon, then they will keep going in monopoly power to force drives other business go out of business. that is not good for us, but apple is good OS and perfectly risc cpu is very fast and efficient than intel. intel used cisc, i believe that cisc is slow. but i want you to break up microsoft for all of us. if broken then we are free to choose.... thank you. and P.S. i dont want apple go out of business. but windows XP is already in violatation of antitrust.... they are already violated too many. (microsoft). that why microsoft should be punished.

and bill gates needs go jailed or pay a fine a tons of billions of dollars. thanks.
